Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Ko et al. (6,756,321).

With respect to claim 9, Ko et al. disclose a first dielectric layer (28) of a first low-k on a substrate (20) (Fig. 1A); a second dielectric layer (34) of a second low-k smaller than said first low-k spun-on said first dielectric layer (Fig. 1B); a plurality of dual damascene vias (46/48) formed in said first and second dielectric layers (Fig. 1D and 1E); a plurality of Cu conductor plugs each filled in one of said plurality of dual damascene vias (Col. 6, lines 56-60); and a barrier layer (50) inserted between said plurality of Cu conductor plugs and first and second dielectric layers (Col. 6, lines 47-51 and Fig. 1E).

With respect to claim 10, Ko et al. disclose wherein said first low-k has a value between 2.5 and 3 (Col. 5, lines 8-13).

With respect to claim 11, Ko et al. disclose wherein said first dielectric layer comprises SiOC (carbon-doped silicon dioxide) (Col. 5, lines 8-13).
